

# Ocean Certified Partner Program

Industry recognition for developers of high-quality, value-adding Ocean plug-ins

## APPLICATIONS

- Recognition for developing high-quality Ocean\* plug-ins
- Ocean plug-in advertising, marketing, and planning

## BENEFITS

- Make your plug-ins stand out from the crowd
- Benefit from our technology insights and market strategies
- Advertise your plug-ins on a dedicated page in the Ocean catalog
- Highlight your expert knowledge and high-quality plug-ins
- Obtain preferential rates on Ocean software licences and training
- Attend Ocean Certified Partner networking meetings, including the Annual Program meeting and a business-planning meeting
- Benefit from special participation with the Ocean team at tradeshow
- Host your own annual webinar to Schlumberger and the Ocean community
- Participate with Schlumberger in collaborative and strategic positioning of new technology and services

The Ocean software development framework enables oil and gas companies, software companies, and academia to create and deploy plug-ins that extend the capabilities of the Petrel\* E&P software platform. Developed internally or in conjunction with Ocean partners, these plug-ins allow the latest science to be rapidly incorporated into company workflows.

## Differentiate your plug-ins and services

The Ocean Certified Partner program is a worldwide initiative that allows software companies to gain recognition for their value-adding Ocean plug-ins and proficiency in using the Ocean framework. Companies signed up and admitted to the program can make both their plug-ins and development services stand out from the crowd using the Ocean Certified Partner brand. The program also allows members to access technology insights and market strategies from Schlumberger and other members, helping them grow their Ocean business and skills.

## Create advantage

As well as being able to promote their plug-ins and services using the Ocean Certified Partner logo, members of the program also receive preferential rates when purchasing Ocean licenses and training courses. Additional benefits include a dedicated page within the Ocean Store catalog, as well as invitations to attend Ocean Certified Partner networking meetings, host annual webinars, and participate alongside the Ocean team at tradeshow.

## Join the Ocean Certified Partner program

To qualify for the Ocean Certified Partner program, you must be able to demonstrate

- proficiency in developing commercial Ocean plug-ins with proven technical workflows that deliver value to customers
- technical domain understanding of Schlumberger software platforms
- structured software-development and quality-control processes
- a history of full adherence to Ocean Store quality acceptance criteria.
